

# You wouldn't consider being uninsured. Why tolerate being unprepared?

To maximize your insurance coverage you should back it up with an equal part of preparation.

Insurance companies recommend you store a

comprehensive video inventory of your household or business in a safe place. It can save you thousands of dollars and hours of frustration and grief after a loss.

Claims adjusters will want as much information as possible. We can help you provide the information needed to make the process easier with better results.

What if you returned home after a fire or burglary to find extensive damage or personal property missing? Could you list all your household goods and possessions? How would you identify recovered property after a burglary?
